Building Wealth with NLP; Making YOUR money work for you!

Prosperity and wealth – is there a magic formula to instantly turn your fortunes around? Perhaps not, but there *is* a trail you can follow. Before you can achieve prosperity and wealth you must learn to become a **Money Master**.

The **Building Wealth with NLP** workshop is a practical, educational programme which helps you to identify the behavioural barriers preventing your access to wealth. During this one-day workshop, you'll also learn a wide range of Neuro-Linguistic Programming (NLP) techniques to help you build more effective patterns of behaviour and overcome negative habits that get in the way of your personal success.

Through the exploration of your money personality and evaluating the current ways you may be limiting your financial performance, we will re-define your approach to money and help you develop a wealth plan that is *tailored to you and your financial goals*.

During the day you will discover:

- Your current financial biography
- How to manage money using simple and practical tools
- Developing new creative strategies with money
- Shifting your thinking and generating new behaviours
- The 9 Money Personalities; their strengths and areas for development
- Motivating yourself for better money management
- How to create a new wealth-generating outcome

Participant Profile:

This interactive and enjoyable programme is designed for professional individuals who recognise they have the potential for greater financial success, but want to find new and better ways to generate more wealth and prosperity.
